for

Modification of Permit No. ST 6185

Toyocom Devices of America, Inc., Longview, WA.

April 2003

Toyocom submitted a request for a minor change to this modification. In a letter received by Ecology March 14, 2003, Toyocom requested the discharge limit change be lowered from 10,000 gallons per day, to 9,999 gallons per day. Ecology will honor this request. Since the change is considered to be more stringent, a new public comment period is not needed. The final permit limit will be changed to 9,999 gallons per day.
